

**Amendment After Allowance under 37 C.F.R. § 1.312**

Applicant: Arthur A. Renda

Serial No.: 09/938, 711

Filed: August 23, 2001

Docket No.: 10011961-1

Title: PRINTING DEVICE WITH READER FOR REMOVABLE MEDIA STORAGE CONTAINER**IN THE CLAIMS**

Please amend claims 19, 34, and 38 as follows:

1-18. (Cancelled)

19. (Currently Amended) A method, comprising:

- inserting a PC Card in a PC Card reader integrated in a printing device;
- retrieving data from a file in a memory of the PC Card that is in an AV predetermined format, the file comprising compressed audio data and other data;
- assembling a key from the other data;
- establishing direct communication between the printing device and an AV information support system;
- supplying the key to the AV information support system directly from the printing device and, with the AV information support system, locating information identified by the key;
- downloading the information identified by the key directly to the printing device without communication of the printing device with [[a]] an interconnected computing device;
- and
- printing a report with the printing device utilizing the downloaded information.

20. (Previously Presented) The method as recited in Claim 19, wherein downloading the information further comprises accessing a remote site and determining if the key is matched at the remote site in order to download the information.

21. (Previously Presented) The method as recited in Claim 19, wherein downloading the information further comprises accessing a telephone number of a remote access site in the key and utilizing the telephone number to locate and download the information.

22. (Previously Presented) The method as recited in Claim 19, wherein downloading the information further comprises accessing a universal resource locator (URL) in the key and utilizing the URL to locate and download the information.

Title: PRINTING DEVICE WITH READER FOR REMOVABLE MEDIA STORAGE CONTAINER

23. (Original) A computer-readable medium comprising computer-executable instructions to perform a method as recited in Claim 19.

24-27. (Cancelled)

28-33. (Cancelled)

34. (Currently Amended) The method as recited in Claim 19, wherein assembling a key further comprises transmitting the key from the printing device to a remote site, and wherein downloading the information further comprises downloading the information identified by the key directly to the printing device from the remote site without communication of the printing device with ~~[[a]]~~ an interconnected computing device.

35. (Previously Presented) The method as recited in Claim 19, wherein the AV predetermined format includes one of an encoded audio format, an encoded video format, an encoded audio-video format, a WINDOWS Media Audio (WMA) format, and a Motion Picture Experts Group (MPEG) format.

36. (Previously Presented) The method as recited in Claim 19, wherein the audio data includes a musical recording, and the other data includes one of a title, an artist indication, an album indication, a year indication, a comment field, and a genre indication of the musical recording.

37. (Previously Presented) The method as recited in Claim 19, wherein said printing occurs without user intervention.

38. (Currently Amended) The method as recited in Claim 19, further comprising:  
generating a listing from the other data; and  
printing a report of the listing with the printing device,  
wherein generating the listing and printing the report occur without communication of the printing device with ~~[[a]]~~ an interconnected computing device.

**Title: PRINTING DEVICE WITH READER FOR REMOVABLE MEDIA STORAGE CONTAINER**

39. (Previously Presented) A method, comprising:
- detecting insertion of a removable memory in a removable memory reader integrated in a printing device;
  - recognizing an AV file stored on the removable memory;
  - assembling a key from data stored with the AV file on the removable memory;
  - transmitting the key over a network to an AV information support system directly from the printing device;
  - using the key by the AV information support system and locating information on the network associated with the AV file;
  - downloading the information associated with the AV file directly to the printing device over the network without an interconnected computing device; and
  - printing at least a portion of the information associated with the AV file with the printing device.
40. (Previously Presented) The method of claim 39, wherein the removable memory includes a PC Card, and the removable memory reader includes a PC Card reader integrated in the printing device.
41. (Previously Presented) The method of claim 39, wherein the key includes a universal resource locator (URL) identifying a location on the network of information associated with the AV file.
42. (Previously Presented) The method of claim 39, wherein a format of the AV file includes one of an encoded audio format, an encoded video format, an encoded audio-video format, a WINDOWS Media Audio (WMA) format, and a Motion Picture Experts Group (MPEG) format.
43. (Previously Presented) The method of claim 39, wherein the AV file includes an audio file of a musical recording, and the data stored with the AV file includes one of a title, an artist indication, an album indication, a year indication, a comment field, and a genre indication of the musical recording.

**Title: PRINTING DEVICE WITH READER FOR REMOVABLE MEDIA STORAGE CONTAINER**

44. (Previously Presented) The method of claim 39, wherein the printing of the at least a portion of the information associated with the AV file occurs without user intervention.

45. (Previously Presented) The method of claim 39, further comprising:  
generating a listing from the data stored with the AV file; and  
printing a report of the listing with the printing device,  
wherein generating the listing and printing the report occur without an interconnected computing device.
